MAXIMUM IT SECURITY AND COMPLIANCE IS NO EXAGGERATION, BUT ESSENTIAL!
Our proven approach is not a painful and costly ordeal. Don't settle for less. Go for the max!

WHY NOT SEE FOR YOURSELF! TAKE IT SECURITY AND COMPLIANCE TO THE MAX!

IDENTIFY AND CONTROL RISKS

OTHERS HAVE NEVER HEARD OF BEFORE!

Today's security and compliance environment demands maximum effectiveness to combat professional fraud and attack. Now you can finally monitor deeper details yourself, like broken audit trails, suppressed logs, dynamic (system) manipulation bypassing security mechanisms, malicious code, fake modules, to detect and then combat the sophisticated tricks of hackers and administrative IT staff.

WHY PAY FOR STANDARD SECURITY AND COMPLIANCE? GO FOR MAX ROI!

Our generous security and compliance monitoring solutions create cost-effective conditions to maximize your ROI. Maximum ROI means:

- ▶ no standard security and compliance level, but superior high-tech solutions
- ▶ no MIPS, but value-based fees, including the “software as a service” option
- ▶ no “split product tactics”, but an integrated all-in-one product design
- ▶ no support charges based on “egg timers”, but premium service

WHY IS MAXIMUM CONTROL OVER OUTSOURCED IT EVEN MORE IMPORTANT?

Do you know what your outsourcing partners and their staff are “really up to”? Which regions of the world are actually serving you? We promise extensive control over your IT when it is in “other hands”.

WHY IS OUR SERVICE TRULY UNIQUE?

We depend entirely on top-level specialization to satisfy the most demanding markets. Just ask why your SOX/ISO/... control set is incomplete if it does not combat the most dangerous risks! Our exclusive clientele can tell you. Only a few countries, like Switzerland, can boast of maximum or extraordinary information protection laws and requirements - even exceeding SOX and DOD.
